

JOB OFFER

Electrical Audio Engineer - full time in Berlin

HEDD | Heinz Electrodynamic Designs is a young manufacturer of professional loudspeakers for music producers, recording artists, and broadcast. Our products have a worldwide reputation and are designed and manufactured in our production facility in Berlin / Germany.

We are looking for an experienced Electrical Audio Engineer preferably specialized in the field of acoustics to join us as soon as possible. With the input of our team of audio enthusiasts and engineers you will design superior sounding and innovative studio monitors. Our vision is to become one of the worldwide leading speaker manufacturers.

This is why we need you to have previous working experience in the following fields:

- Measurement methods and technology
- Simulation (*SPICE* or comparable)
- CAD software (*Solid Edge* or comparable)
- Audio electronics and DSP technology
- Loudspeaker technology

As a speaker designer at HEDD we have many interesting projects for you, all of them concerning loudspeakers and related fields. We offer you a big responsibility in an aspiring company with plenty of start-up atmosphere, great team spirit and fair payment.

If you have the required skillset and want to join our team, we cannot wait to receive your digital application! Please send it to: info@hedd.audio.
